

GUIDELINES FOR QUARANTINE AFTER EXPOSURE

This flow chart can help guide quarantine decisions after a person is exposed to someone with COVID-19.*

Did you have contact with a COVID-19 case?

Not a contact, however exposed person is recommended to:

- **Wear a mask indoors**, as much as possible, **either** for 14 days or until 7 days if they receive a **negative viral** (PCR or antigen) **test** performed at least **3 days after exposure**.
- If symptoms develop, exposed person must **isolate** at home for at least **10 days from symptom onset date**.

Contacts are required to:

- **Quarantine** at home for **10 days** from last exposure date.
- Monitor for symptoms for **14 days**.
- If symptoms develop, **isolate** at home for at least **10 days from symptom onset date**.

Does the school have ALL of the following in place?

1. **Masking** for students and staff (regardless of vaccination status)
2. Strategies to **maximize physical distancing** (at least 3 feet between desks)
3. Documented **COVID-19 prevention policies** and procedures (identification of individuals experiencing symptoms, strategies for increase ventilation, protocols for cleaning, etc.)

*This flow chart is a guide to help identify contacts. Some situations may deviate from the flowchart. (e.g. prolonged exposure in an enclosed environment, household settings).

**A classroom setting does not include exposure in the community, sports, or extracurricular activities.
